

INDIAN WATER WORKS ASSOCIATION ANNOUNCES TRAINING COURSE IN RAIN WATER HARVESTING

Every summer there is a big hue & cry for drinking water in our cities. Rapid urbanization is leading to overexploitation & pollution of water resources which leads to water scarcity, whereas on the other hand the demand for water increases every day.

This scenario has created several questions which need to be addressed in proper fashion to bring the situation under control viz.

- How can we augment depleting ground water?
- How to ensure continuous availability of water?
- How the load on Municipal water supply can be reduced?
- How we can minimize flooding in urban areas when there is excess rain in short duration or when there is high tide? (For example situation city like Mumbai)

You can get the answers to these questions from this 2 day training programme organized by Mumbai Centre of Indian Water Works Association.

Indian Water Works Association (IWWA) Mumbai is a non government organization established in 1968 by engineers from Hydraulic Engineers Department of Municipal Corporation of Greater Mumbai & Brihan Mumbai Licensed Plumbing Association, Mumbai under the leadership of then Municipal Hydraulic Engineer late Shri D.R.Bhise to give a platform to engineers, consultants, scientists, environmentalists & contractors from the field of Water & waste water to interact with each other to find solutions to the problems in the field through its 27 centers all over India .IWWA disseminates the latest trends & technologies in water treatment, water quality waster water treatment, eco- sanitation, environment , pollution by way of holding seminars, workshops & Conferences at Nations & international levels A quarterly journal is published to give a chance to publish their research papers, case studies ect to all working in these fields IWWA has collaboration agreement with Amrcian water Works Association (AWWA) USA, to print their standards related with water & water treatments in India for Indian engineering fraternity .IWWA has also entered in MOU with international Water Association (IWA) UK, to hold workshops on eco-sanitation in India, as well as supply of material for Ecosan projects in India. IWWA is also has collaboration with Japan Water Works Association (JWWA) , Japan,for latest technologies in these fields. IWWA is also member of Global Water Partnership (GWP) under United nations.

Who should attend this training?

Engineers from Municipal Corporation , PHED,PWD Architects, Urban Planners, policy Makers, Environment Consultants, members of housing Society & other Government officers who are interested in knowing theory, practice & policies of Urban Rain Water Harvesting.

Course Contents:

- India's rich tradition of rain water harvesting & current paradigms.
- Understanding basics of groundwater hydrogeology.
- Planning, designing, construction process, maintenance & monitoring Mechanisms for costing, water quality issues, treatment options , filters etc
- Models for Residential & Institutional buildings, colonies, industries , public areas like parks, Airports, Afforested areas etc.
- Water policy & Legislation : Fiscal incentives & disincentives.
- Strategies for catalyzing rain water harvesting , Experiences & Examples

Tools :

Classroom lectures by experts, site visit to rain water harvesting projects in city, practical exercises by participant in designing of a model RWH scheme.

This 2 day training will equip participants with planning & designing skills of rain water harvesting for storing of rain water for direct use & Techniques for Ground water recharge.

Participants will be given certificate of participation from Indian Water Work Association.

Course fee ; Rs 2000/- per participant

Rs 1500/- for IWWA members.

Venue : Conference hall of IWWA at –IWWA head quarters building, pipeline Road, Santacruz (East),Mumbai 400 055 Contact No.- 26672665 / 26672666.

Date : 11th &12th Dec 2010

Contact persons:
