

# Training and facilitation in hydrogeology to enhance Civil Society capabilities in Watershed Management

## FEATURES OF THE COURSE

A 15-day training course in PLANNING, DEVELOPMENT AND MANAGEMENT OF GROUNDWATER WITH SPECIAL REFERENCE TO WATERSHED DEVELOPMENT PROGRAMMES

Classroom sessions, fieldwork and practical hands-on work.

Training handouts in the form of a manual.

Provision for FIELD FACILITATION.

# Main topics of the course

The science of groundwater - Hydrogeology

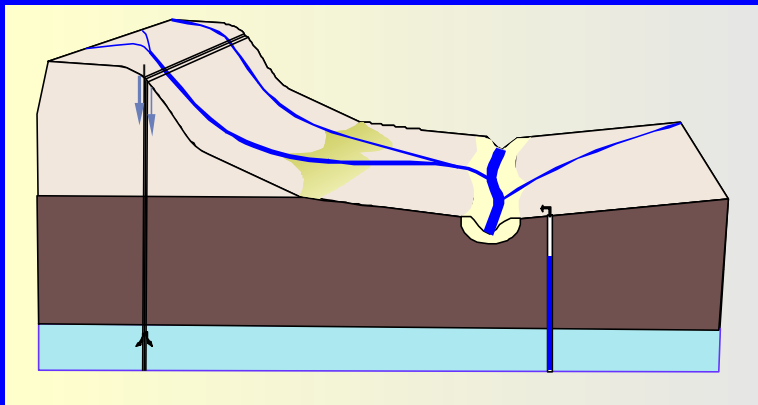

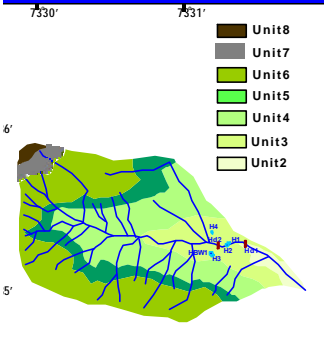

Mapping groundwater resources in a watershed using simple observations

Measurement and monitoring groundwater identifying aquifers in a watershed and observing the accumulation and flow of groundwater

Groundwater quality

Hydrogeology as a tool in planning and implementing watershed management

Integrated water resources management including groundwater management in watershed management programmes

ACWADAM's training team:

-  More than 25 years of experience in the field of education and applied research on groundwater.
-  Strong *field interpretation* skills.
-  Good communication skills in English and Hindi (course will be conducted in simple English).
-  Experience of training diverse target audiences.
