Indian Green Building Council

“Green buildings should create delight as you enter, serenity & health when occupied and regret when you depart”

- Natural Capitalism

Introduction

Housing is one of the fastest growing sectors in the construction industry in India. The sector is expected to grow at an annual rate of 25-30%. This augurs well for the economy. At the same time, it presents various challenges viz., supply of uninterrupted power & water, handling of home waste, providing adequate amenities etc.,

For the growth to be sustainable, adoption of eco-friendly practices in the housing sector is an imperative. This would go a long way in addressing national priorities such as water conservation, energy efficiency and material resources.

In this context, the Indian Green Building Council (IGBC) is making rapid strides in greening the construction industry. Till date there are **919** green buildings coming up in the country with a green building foot print of nearly **590** million sq.ft. About **1,46,000** dwelling units are designed and coming up in various parts of the country. IGBC rating system encourages applications of simple design measures in construction of green homes.

Conference on Green Homes, 2011

To further advance the adoption of green home concept, IGBC is organising the Green Homes 2011 conference on 8 & 9 April, 2011 at Mumbai.

Benefits to Participants

- Awareness on “Green homes”
- Best practices on designing Green Homes
- Tangible & Intangible benefits of green homes
- Exposure to new trends & technologies in eco-friendly homes

Email: landsend.mumbai@tajhotels.com

Glimpses of Green Homes 2010

'I think I'm subconsciously often strongly influenced by nature, and much of nature's 'structural work' is not straight or square'

- Ar. Laurie Baker

About Indian Green Building Council

The Indian Green Building Council (IGBC), part of Confederation of Indian Industry (CII) was formed in the year 2001. The vision of the council is to usher in a green building movement in India and facilitate India to become one of the global leaders in green buildings by 2015.

The council offers a wide array of services which include developing new green building rating programmes, certification services and green building training programmes. The council also organises Green Building Congress, its annual flagship event on green buildings.

The council is committee-based, member-driven and consensus-focused. All the stakeholders of construction industry comprising of architects, developers, product manufacturers, corporate, Government, academia and nodal agencies participate in the council activities through local chapters

About CII

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the growth of industry in India, partnering industry and government alike through advisory and consultative processes.

CII is a non-government, not-for-profit, industry led and industry managed organisation, playing a proactive role in India's development process. Founded over 115 years ago, it is India's premier business association, with a direct membership of over 8100 organisations from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 90,000 companies from around 400 national and regional sectoral associations.

CII catalyses change by working closely with government on policy issues, enhancing efficiency, competitiveness and expanding business opportunities for industry through a range of specialised services and global linkages. It also provides a platform for sectoral consensus building and networking. Major emphasis is laid on projecting a positive image of business, assisting industry to identify and execute corporate citizenship programmes. Partnerships with over 120 NGOs across the country carry forward our initiatives in integrated and inclusive development, which include health, education, livelihood, diversity management, skill development and environment, to name a few.

CII has taken up the agenda of "Business for Livelihood" for the year 2010-11. Businesses are part of civil society and creating livelihoods is the best act of corporate social responsibility. Looking ahead, the focus for 2010-11 would be

on the four key Enablers for Sustainable Enterprises: Education, Employability, Innovation and Entrepreneurship. While Education and Employability help create a qualified and skilled workforce, Innovation and Entrepreneurship would drive growth and employment generation.

With 64 offices in India, 9 overseas in Australia, Austria, China, France, Germany, Japan, Singapore, UK, and USA, and institutional partnerships with 223 counterpart organisations in 90 countries, CII serves as a reference point for Indian industry and the international business community.

About CII-Godrej GBC

CII – Sohrabji Godrej Green Business Centre (CII – Godrej GBC), a division of Confederation of Indian Industry (CII) is India's premier developmental institution, offering advisory services to the industry on environmental aspects and works in the areas of Green Buildings, Energy Efficiency, Water Management, Renewable Energy, Green Business Incubation and Climate Change activities.

The Centre sensitises key stakeholders to embrace green practices and facilitates market transformation, paving way for India to become one of the global leaders in green businesses by 2015.
