About the Conference ESNRM – 2012

Natural resource is an important factor for life on the Earth. Natural resources have prime importance in modern human life. Most of the natural resources are non-renewable. Some natural resources are renewable but it takes much longer period for its replenishment due to which they are becoming scarce. There is much debate worldwide over natural resource allocations due to increasing scarcity, depletion and exploitation of natural resources as it is the basis for many economies. Reckless exploitation, probing of chemicals and toxicants has degraded the quality of natural resources. The biological system on the earth is under threat due to depletion of natural resource quality and quantity.

It is necessary to act as a watchdog for protection, preservation and conservation of natural resources. Environmental surveillance ensures the basic step in the natural resource management. The issues related to availability status and sustainable resource development and rational utilization of resources will be discussed in this conference. The world is facing acute crises of food, water and energy resources. Therefore an attempt will be made to discuss the importance of environmental surveillance in natural resource management. This conference will also helpful to understand the need of public participation in protection, preservation and conservation of natural resources.

Through this conference an attempt will be made to focus on air, water and soil monitoring and innovative processes for sustainable resource management, it is expected that the local environmental issues and status of natural resource will be discussed during the proceedings of the conference. The scientist from National Organizations and Universities of the country will share their experiences on various aspects of environmental management. This conference will be beneficial to the students, researchers, and local people to understand the comprehensive efforts required from the society for sustainable environment and natural resource management.

The Venue...

North Maharashtra University is situated 8 km from Jalgaon city, sprawls in an area of 750 acres along the bank of the river Girna and highly visible site from the Asian Highway No. 46. It was established in 1990 and its jurisdiction covers the three district of North Maharashtra region, viz. Jalgaon, Dhule and Nandurbar. The Jalgaon city is 20 km away from the Bhusawal Railway Junction and 150 km from Aurangabad. It is 400 km from Mumbai, Indore, Pune, Nagpur and Surat. The World Heritage Ajanta Caves are 60 km away from the Jalgaon city.

Climate...

The climate of Jalgaon during January is pleasant. Day & night temperatures vary from 15 to 32°C and 10 to 15°C respectively.

About The School...

The School of Environmental & Earth Sciences is one of the new school in the University and was established on 1st July 1999. The School has building with 7500 sq. m. built up area. Eco-friendly approach in the process of development is a unique culture at the school. In addition to M. Sc. (Environmental Science) the school has started M. Sc. (Applied Geology) from the academic year 2007-2008 and M. Tech. (Environmental Science and Technology) from the year 2008-2009. The School has recently started M. Sc. /M. A. (Applied Geography) from the year 2010-2011. The School always leads in the area of

environmental awareness, resource conservation, geological explorations, field visits and social activities in the areas of environment, geology and geography. School is recognized as a key resource centre by Rural Water Supply & Sanitation Department of Govt. of Maharashtra. Over period of 10 years the school was established as a centre of quality teaching, research & extension activities in environmental & earth sciences. It has state of art equipments and facilities for research in identified thrust areas. The school has been recognized by UGC, New Delhi, under Special Assistance Programme (SAP) in 2009.

Thrust Areas.....

Industrial Waste Management
Solid Waste Management
Environmental Pollution Monitoring, Control & Modeling
Groundwater Management and Development
Remote Sensing & GIS
Environmental Biotechnology
Energy & Environment
Environmental Geography
Natural Hazards & Risk Assessment
Climate Change
Hydrology
Geo-Medical Health Hazards
Sustainable Agricultural Management
Environment & Health

Call for Papers and posters....

Abstract: The participants for the conference are invited to submit abstract for oral or poster presentation to the conference secretary by 28th December 2011. The acceptance of the abstract for oral/poster presentation will be communicated by us. The abstract should be about 250 words with at least 4/5 keywords and submit in the MS-Word format only (MS-Office 2003-2007). Abstracts for oral/poster presentation will be printed in conference souvenir. The abstract can be sent an E-mail attachment to: esnrm2012@gmail.com

Accommodation...

Suitable accommodation will be made on the University Campus.
