

**National Seminar
on
Challenges and Issues
in
Renewable Energy**
(March 15-16, 2012)

*A Unique opportunity to learn through
interaction with experts & practitioners.....*

Power Management Institute

About PMI

Power Management Institute (PMI) was set up by *NTPC* in recognition of the vital role that competence development of people has to play in the context of challenges associated with the growth of the Indian Power sector. The institution is involved in the training and development of senior personnel not only from power sector but from other organizations as well. PMI is committed to be leading institute for developing world class competencies by providing a state of the art training, which responds proactively to meet the needs of power sector. Over the years, PMI has developed its strength in designing and delivering customized programs in technical and management areas. The infrastructure and idyllic surroundings of PMI makes it a place for conducive learning and self development.

Seminar Objectives

India relies heavily on Coal and Oil for meeting its Energy needs. Although India has over 20 GW capacity coming from Renewable Sources connected to a grid of over 185 GW, contributing to over 10% of the installed capacity. However this contributes only about 3% to the total actual generation. The availability of coal for Power Generation has become critical in recent year and the reported shortage of coal is up to 30%. This bring into focus the need for more emphasis on Renewable Energy, which needs to be pursued not only for energy security and environmental sustainability but also for its viability as an energy source for our citizens located at the remotest places and the most deprived ones.

This seminar is designed to share amongst the participants the experience of policy makers, manufacturers, academicians and other experts in the field.

Seminar Profile

- ◆ Policy Related to Renewable Energy
- ◆ Renewable Potential in India
- ◆ Emerging Technologies in Renewable Energy
- ◆ Government Initiatives and support
- ◆ Financial/Technical/Regulatory and other barriers.
- ◆ Way ahead in Renewable Energy

Methodology

Presentation sessions and case discussions by professionals from Industry, Government, Financial Institutions and academia organizations

Who May Attend

Senior executives involved in planning, implementation and running of renewable energy projects.

Delegate Fees:

₹ 13236/- (including service tax) per participant (DD in favor of NTPC Limited payable at New Delhi). The seminar is non residential.

Participants have to arrange their conveyance and accommodation.
