

# Apply now for World Water Week Training Courses on Water Management

19-20 August, 2011

Ahead of the 2011 World Water Week in Stockholm, Cap-Net/UNDP and the Stockholm International Water Institute (SIWI) will give the opportunity to World Water Week participants and non-participants alike to improve their water management knowledge and skills.

The courses are designed for water management practitioners, donor agency workers, government representatives, capacity builders, members of civil society organisations and other groups. The courses aim to promote IWRM implementation and therefore a multidiscipline target group is aimed for.

## Facilitation

The courses will be facilitated by experienced capacity builders from partner networks affiliated to Cap-Net and SIWI. The courses will make use of existing and tested training materials developed by Cap-Net and SIWI that will be made available to the participants. Each course will be an intensive one-day session, using a combination of lectures, facilitated discussion and group exercises.

## Courses

### Friday 19 August 2011

- IWRM as a Tool for Climate Change Adaptation
- Participatory Tools for IWRM Planning and Training
- Water Integrity

### Saturday 20 August 2011

- Groundwater Management
- How to be an Effective Agent of Change in IWRM Processes
- Legislation for IWRM

*The course designs are based on the experience of Cap-Net affiliated networks and SIWI who intensively deliver capacity building for IWRM globally.*

## Practical information

Language: English.

Fee and registration: 400 USD for a one-day course

Location: SIWI's facilities at Drottninggatan 33, 111 51 Stockholm, Sweden
