

Organisers:

**Prof. (Dr.) Kuldeep
Chand Agnihotri**
Patron

Prof. Suman Bedi
Co-Patron

Prof. Dai-Yeun-Jeong
Organiser

Dr. Mohinder Slariya
Organising Secretary

Dr. Deepak Pant
Convener

Venue:

Central University of
Himachal Pradesh,
Chattri, Dist Kangra,
Shahpur, Himachal
Pradesh 176206

The conference aims to provide a platform for interdisciplinary research involving researchers from science, social sciences and the humanities focusing on the human dimensions of development, climate change and carbon management. It connects to universal concepts such as fairness, justice, risk, and sustainability and quantitative and qualitative research in Human Dimensions of Development and climate change. Human Dimensions Focuses on:

1. a focus on people's engagements with elements of natural environments, from a psychological and/or cultural point of view;
2. a focus on the management interventions that mediate those engagements, including governance, legislation, policy and planning; and,
3. a focus on the response of natural environments to people's engagements. Carbon management covers the various

activities like climate change, CO2 capture and utilization, waste management involving both chemical and biological tools. Social impact assessment is generally ignored before planning any management strategic. Many natural, anthropogenic and societal events have to be considered before projecting sustainable carbon management strategies. So generally carbon management focuses on; a) minimizing emission while focusing on any developmental project aiming to make a better world to live in b) maximizing environmentally sound reuse, reduce and recycling for better and sustainable future; c) effective treatment of threatening aspects of development to ensure healthy and better world d) converting carbon into valuable products with atom economy to enhance livelihood options by creating more awareness on changing environmental conditions. The idea of this conference involves designing a sustainable management plan by focusing on human dimensions of development, environment and carbon management with the compatible involvement of social and scientific aspect

Himalayan Climate Meet 2016

International Conference
Focusing on "Human
Dimension of
Development, Climate
Change and Carbon
Management"

Department of Sociology,
Govt. College Chamba

Asia Climate Change
Education Centre, Jeju,
South Korea

School of Earth and
Environmental Sciences,
Central University of
Himachal Pradesh,
Dharamshala, India

11-12 December 2016

Sub-Themes

- Managing River Basins Based Development: Issues, Challenges and Solutions
- Technological Interventions: Role of IITs, NITs and other Research Institutions
- Global Water Governance for Sustainable Future
- Engagement of Community, Gender, Education and Leadership for Development and Carbon Management
- Climate Change, Water, Energy and Food Nexus: Possibilities and Challenges
- Challenges to Hydro based Development in Indian Himalayan Region (IHR)
- River basin and Carbon Management in Context of Climate Change
- Water Security, Climate Change and Natural Disasters
- Development and Disaster Management with special Reference to Himachal Pradesh
- River for Future: Restoration Perspective
- Role of Rivers in Development of Civilization: Past, Present and Future
- Institutional issues with Policy and Governance for Development and Carbon Management
- Business, Industry and Future of Carbon Management in Changing Climatic Conditions
- Technology, Innovation and People's Interventions in River and Carbon Management
- Recent Trends in Carbon Sequestration
- Waste Management
- Carbon Management with Ancient and Vedic Science
- Natural Radiation and Environment

- Toxic and Hazardous Waste Management
- Recent Trends in Environmental Biotechnology
- Green Techniques
- Natural Hazards and Climate Change
