

“Training Workshop on Ground Water Management & Rain Water Harvesting and Artificial Recharge”, April 20-21, 2012 at Rajputana Resort in Udaipur

—

Rainwater Harvesting safeguards freshwater resources in water-stressed urban areas. The method reverses the trend of water resources degradation and contributes to ecological sound management of rainfall and run-off.

EA Water has been promoting rainwater harvesting as a practical solution for meeting water scarcity and recharging the fast depleting groundwater table through its various Seminars, Training Workshops, Magazines & Books. After the huge success in Training on ‘Rain Water Harvesting & Ground Water Management’ at Goa in the month of June, At Mount Abu in the month of September 2009, At Ooty in the month of Nov 19 & 20, 2009 and Mumbai in the month of March 2010. **Now we are delighted to announce another extensive ‘Training workshop Ground Water Management & Rain Water Harvesting at Udaipur on 20th & 21st April 2012’.** The Training Workshop focuses on the theory, practice and policy of rainwater harvesting. It combines classroom lectures, practical exercises, Case Studies and interactive sessions to help attendees plan, design and install rainwater harvesting systems for micro and macro catchments in urban-rural areas.

COURSE MODULES

Day 1: A) GROUND WATER MANAGEMENT SOLUTIONS FOR INDUSTRIES: April 20, 2012

- _A) a. Session 1- Hydrological Cycle and Indian perspective**
- b). Session 2- Integrated water resource management and exploration**
- c). Session 3- Water Shed management, water harvesting, conservations and recharge**
- B) Case Studies of various techniques of Ground Water Management and Rain Water Harvesting**

Day 2) RAIN WATER HARVESTING & ARTIFICIAL RECHARGE: April 21, 2012

- _a. Session 1- Scientific source finding**
- b. Session 2- Various ground water exploration surveys and tube well drilling and development**
- c. recharges technologies in hard rock area**
- d. case studies**

PLANT VISIT:

Traditional water harvesting structures, their state of negligence & relevance in today’s context and latest RWH project sites

Send Your Queries for Discussions:

It is an interactive programme, where participants can send their specific problems beforehand, so that these can be prepared for and discussed during the training.

Date: April 20-21, 2012 Time: 10:00 am to 5:00 pm

Venue: Rajputana Resort four star resort in UDAIPUR. Udaipur is the jewel of Mewar - a kingdom ruled by the Sisodia dynasty for 1200 years. The foundation of the city has an interesting legend associated with it. According to it, Maharana Udai Singh, the founder, was hunting one day when he met a holy man meditating on a hill overlooking the Lake Pichhola. Several places of interest around Udaipur, including the majestic Chittaurgarh, the mountain fortress of Kumbhalgarh, beautiful Jain temples of Ranakpur, religious townships of Eklingji and Nathdwara and the cool retreat of Mount Abu, make the visit to this region a memorable one.

Who should attend?

- All Water Professionals
- OEMs & Water Consultants
- Civil engineers
- Architects
- Urban planners
- Environment consultants
- Municipal water managers
- Policy makers
- NGO Members

About Instructor: Mr. R.N. Shukla is PGD Remote Sensing - IIT Bombay and CEO - PANAM Water Solutions firm believer in water conservation and development of sustainable water resource management, has given more than 39 years of his life to water resource management And related fields in water sector. Now he is Senior Consultant - Water and Sanitation Management Organization and Senior National Consultant - United Waters, Switzerland.
