waterless solutions

waterless urinal systems.

Sustainability combined
with function & design.

Those who love life must conserve water.

Water is the source of all life. It covers vast parts of the globe, which is why Earth is such a breathtakingly beautiful “blue planet”. Water, however, is primarily a valuable resource that we have to use very economically. Only 0.3 % of the entire world’s water resources are pure drinking water, which is essential for the continuing life and survival of the human race. The world’s drinking water resources are already becoming noticeably scarcer. Each drop is precious. Too precious to be simply flushed away in urinals. That was also the opinion of John Reese, which is why he developed the waterless uridan® urinal in 1998.

As opposed to a conventional urinal, a uridan® urinal works without water and, thus, saves around 200,000 litres of precious drinking water annually. This ensures that the “raw material of life” is conserved for more important things. For the future of our children and our children’s children. And, of course, for pure pleasure.

“uridan® enables us to be a part of a revolution that will bequeath a better world to our children.”

John Reese

Zero odour + Zero chemicals = perfect hygiene.

The waterless uridan® urinals are more hygienic than conventional flushing systems. The moist environment in conventional flushing systems actually encourages the development of bacteria and fungi on the surfaces.

The centrepiece of the uridan® urinals is the patented uridan® odour trap: This odour trap works with the aid of urilock®, a special blocking fluid. urilock® consists of plant-based substances and is biodegradable. Due to the fact that it is lighter than urine, the heavier urine automatically flows directly down the drain. The lighter urilock® stays on the surface and works like a liquid lid that blocks out all drain and sewage odours.

In addition to protecting the environment, uridan® urinals also protect your bank account. Just one uridan® urinal saves up to 200,000 litres of water per year, which in turn saves you money.

Aesthetics make the crucial difference.

Whether for large facilities or for premises offering very little space – the uridan® product range offers the perfect individual solution to suit any requirement. And, in addition to the successful standard urinal systems, our range of products also offers customised products to suit any colour preference.

Colours

Most of the types are available in the displayed range of colours in resilient glass fibre reinforced plastic. Other colours can be provided upon request.

Type Admiral

by designer Troels Bøgely

Material: Ceramic or glass fibre reinforced plastic (GFP)
Colours: all colours (ceramic is available in White)
urilock® blocking fluid exchange: after being used for approx. 15,000 to 20,000 times
Installation: horizontal or vertical

The type Admiral has a distinctive elegance. Not only did the designer want to create an attractive urinal, but also a particularly user-friendly model. Due to the simple shape with the smooth and rounded off surface, this uridan® urinal can be cleaned very easily and quickly. In addition, there are no screws or grooves that could make cleaning difficult.

Type Cadet

by designer Troels Bøgely

Material: Ceramic or glass fibre reinforced plastic (GFP)
Colours: all colours (ceramic is available in White)
urilock® blocking fluid exchange: after being used for approx. 5,000 to 7,500 times
Installation: horizontal or vertical

Due to the timeless design, the type Cadet has become a real classic. In addition to the ceramic version, this type is also provided in glass fibre reinforced plastic (GFP). This material is even more resilient than ceramic. It is distinguished by an extremely long life cycle and provides a high level of security against vandalism.

Type Captain

by designer Yu Bobek

Material: Glass fibre reinforced plastic (GFP)
Colours: Granite and White
urilock® blocking fluid exchange: after being used for approx. 15,000 to 20,000 times
Installation: vertical

The type Captain enables women to do what men have been able to do for a long time: To use a urinal without having to sit down. The type is distinguished by a perfectly shaped design and the highest possible level of hygiene: At last, women can simply squat to urinate without having to touch a toilet seat at all. This type is now a popular feature in alpine huts.

Type Compass

by designer uridan a/s

Material: Glass fibre reinforced plastic (GFP)
Colours: Granite and White
urilock® blocking fluid exchange: After being used for approx. 15,000 to 20,000 times
Installation: vertical

The Compass waterless urinal is ideally suited for families living in both apartment buildings and in single-family houses. It has also gained popularity for use in low-energy houses. The versatile type Compass can be used by men, women and children alike.

Type Pylon

by designer Troels Bøgely

Material: Glass fibre reinforced plastic (GFP)
Colours: all colours
urilock® blocking fluid exchange: after being used for approx. 5,000 to 7,500 times
Installation: vertical

The type Pylon is a pleasure for users at any age. In addition to the extravagant design, this is also due to the three convenient sizes (Mini, Midi, Maxi), which can be used by preschool children through to adults. The type Pylon also provides a cost-saving benefit due to its ability to be installed over the existing toilet drain.

Type Crew

by designer uridan a/s

Material: Glass fibre reinforced plastic (GFP)
Colours: Stone Grey and Granite
urilock® blocking fluid exchange: After being used for approx. 15,000 to 20,000 times
Installation: horizontal and vertical

The type Crew is ideally suited for use in places where large numbers of people congregate, for instance, in football stadiums. The type Crew is available in three different lengths (120, 180 and 240 cm) and helps to ensure that both the waiting times in toilet queues are kept to a minimum during the half-time interval and that the water costs are reduced. The resilient plastic material also provides sufficient protection against vandalism.

Diversity in its highest appearance form.

The tried and tested uridan® urinals have been created by top designers to stylishly fulfil the highest demands in terms of both form and function.

These models can be found in many top-class hotels, large-scale commercial enterprises, successful catering businesses, schools, kindergarten and preschool facilities, as well as in official buildings and, of course, at modern a number of airports, sports stadiums and camping sites.

The best thing about it: The wide range of excellent designs is sure to include the most appropriate and well proven model to meet absolutely every application.

Less effort, less costs, more comfort.

The cost-efficiency of the uridan® urinal begins with the simple installation, because a urinal that doesn't need water also doesn't need any complex expensive electrical flushing controllers or associated water pipe-work and fittings. This ensures an enormous reduction of the installation, operating and maintenance costs.

The uridan® cost calculator proves how you can save lots of money in an environmentally sound and sustainable way. Scan and calculate now.

Two easy steps for perfect cleanliness.

1. Cleaning the cover

- » Spray uriclean® on the cover.
- » Leave for a moment to react.
- » Clean by brushing circularly with a conventional brush.

2. Cleaning the urinal surface

- » Spray uriclean® on the outer and inner surface.
- » Leave for a moment to react.
- » Polish the outer and inner surface in circular motions with the aid of the uricloth® cleaning cloth.

See for yourself how fast and easy perfect cleaning can be. Simply scan the QR code in order to view the application illustrations.

A concept takes the world by storm.

uridan® is represented in 40 countries around the world and continues its expansion. You will find a constantly updated list of the contact addresses of all distribution partners on www.uridan.com.

You can personally find out about the many advantages provided by our revolutionary technology by simply scanning the QR code.

Natural, practical, remarkable – the uridan® hygiene system.

uriclean®

uridan® can be cleaned easily each day with the aid of uriclean®. Simply spray the urinal surface with uriclean® and the lotus effect prevents any adhesion of urine drops: They simply roll off.

urilock®

The patented special fluid not only ensures that uridan® urinals are up to 100 % odourless, but that they also operate perfectly and reliably without the need of any sealants or chemical additives whatsoever.
